

DUSCHKABINE SERIE ED416

Pivot-Duschabtrennung mit Festelement · Eckmontage

DE

EN

IT

FR

PL

Serie ED416 – Pivot-Tür mit festem Glaselement, Aluminiumprofile in Ihrer gewählten Ausführung.

WARNUNG – VOR DER MONTAGE LESEN

- Schrauben an Glasflächen ausschließlich **von Hand** eindrehen – niemals mit der Bohrmaschine.
- Die Wandprofile **15 mm** vom äußeren Rand der Duschwanne entfernt positionieren.
- Glaselemente sind schwer: immer **zu zweit** tragen und gegen Umkippen sichern.
- Pfeile auf dem Glas zeigen nach **oben außen**. Elemente ohne Pfeile sind beidseitig verwendbar.

BENÖTIGTE WERKZEUGE

Bohrer $\varnothing$ 3,0 mm und Innensechskantschlüssel liegen bei.

Bohrmaschine

Wasserwaage

Kreuzschraubendreher

Gummihammer

Silikonpistole + Sanitärsilikon

Bleistift

Schere oder Messer

LIEFERUMFANG

Prüfen Sie alle Teile vor Beginn der Montage auf Vollständigkeit.

 x1	 x1	 x1	 x1	 x1

 x10	 x1	 x2	 x2	 x1
 4*16 x1	 4*30 x8	 4*16 x4	 x1	 x1
 x1	 Φ 3.0 x1	 x2	 x3	 x1

MONTAGE

Montieren Sie die Duschkabine in der angegebenen Reihenfolge. Alle Schraubverbindungen an Glas nur von Hand anziehen.

01 WANDPROFIL MONTIEREN

Richten Sie das Wandprofil mit der Wasserwaage senkrecht aus – 15 mm vom äußeren Wannenrand – und markieren Sie die Bohrlöcher mit dem Bleistift. Bohren Sie die Löcher, setzen Sie die Dübel mit dem Gummihammer ein und verschrauben Sie das Profil mit den Schrauben 4×30.

02 GLASELEMENT VORBEREITEN

Tragen Sie das feste Glaselement zu zweit an den Montageort. Beachten Sie die Ausrichtung: Die Pfeile auf dem Glas zeigen nach oben außen – Elemente ohne Pfeile können beidseitig eingebaut werden.

03 GUMMIDICHTUNGEN UNTERLEGEN

Legen Sie die Gummidichtungen auf den Wannenrand unter das feste Glaselement. Sie entlasten das Glas vom Druck. Überstehendes Gummi nach der Montage mit einem Messer sauber abschneiden.

04 GLASELEMENT EINSCHIEBEN

Schieben Sie das feste Glaselement vorsichtig von oben in das montierte Wandprofil ein, bis es vollständig im Aluminiumprofil sitzt. Das Element dabei durchgehend führen und nicht verkanten.

05 ZWEITES WANDPROFIL MONTIEREN

Richten Sie das zweite Profil mit der Wasserwaage aus und markieren Sie die Bohrlöcher. Bohren Sie die Löcher in Dübelgröße, setzen Sie die Dübel ein und verschrauben Sie das Profil mit den Schrauben 4x30.

06 GLASTÜR EINSETZEN

Setzen Sie die Glastür mit dem Aluminiumprofil in die Führungsschiene und verschrauben Sie die Eckverbindungen von Hand mit den Schrauben 4×16. Die Schraubenköpfe mit den Abdeckkappen verschließen.

Hinweis: Die Innenseite des Glases ist nano-beschichtet, die Außenseite ist markiert. Nicht markierte Glaselemente sind beidseitig montierbar.

07 DICHTUNGEN ANBRINGEN

Montieren Sie die Abdeckung auf dem Alu-Eckprofil. Bringen Sie anschließend die Magnetdichtung und die Abstreifdichtung an der Tür an und setzen Sie die Lamellendichtung zwischen Glas und Aluminiumprofil ein. Zu lange Dichtungen mit der Schere kürzen.

08 FÜHRUNGSSCHIENE VERSCHRAUBEN UND VERSIEGELN

Verschrauben Sie die Führungsschiene mit dem Türprofil (Schrauben 4×16, von Hand). Versiegeln Sie anschließend den Spritzchutz entlang der Duschwanne innen und außen mit Sanitärsilikon.

09 GRIFF MONTIEREN UND ABSCHLIESSEN

Montieren Sie den Griff an den vorgebohrten Löchern der Glastür (Ø 3 mm, Abstand 150 mm) – nur von Hand anziehen. Bringen Sie zuletzt die Abdeckung an der Führungsschiene an und versiegeln Sie die Kanten mit Silikon.

DAMIT SIE LANGE FREUDE HABEN

PFLEGEHINWEISE

- 1 Verwenden Sie zur Reinigung nur ein weiches Tuch und klares Wasser.
- 2 Keine aggressiven Reinigungsmittel oder Chemikalien verwenden.
- 3 Keine kratzenden Gegenstände benutzen. Bei hartnäckigen Flecken hilft essighaltiges Wasser in geringer Konzentration – danach gründlich abspülen.
- 4 Wischen Sie regelmäßig mit einem feuchten Baumwolltuch nach.
- 5 **Kein WC-Reiniger!** Gelangt dieser versehentlich auf die Duschkabine, sofort mit klarem Wasser abspülen.

Hinweis: Diese Anleitung ist ein allgemeines Standard-Handbuch. Produktaktualisierungen sind eventuell nicht enthalten – bitte bei Abweichungen als Referenz verwenden. Bei Fragen hilft Ihnen unser Kunden-Support unter wunderbad.com gerne weiter.

SHOWER ENCLOSURE ED416 SERIES

DE

EN

IT

FR

PL

Pivot shower door with fixed panel · Corner installation

ED416 series – pivot door with fixed glass panel, aluminium profiles in your chosen finish.

WARNING – READ BEFORE ASSEMBLY

- Tighten screws on glass surfaces **by hand only** – never with a drill.
- Position the wall profiles **15 mm** from the outer edge of the shower tray.
- Glass panels are heavy: always carry them **with two people** and secure against tipping.
- Arrows on the glass point **up and outwards**. Panels without arrows can be used either way round.

TOOLS REQUIRED

Drill bit $\varnothing$ 3.0 mm and hex key are included.

Drill

Spirit level

Phillips screwdriver

Rubber mallet

Caulking gun + sanitary silicone

Pencil

Scissors or knife

SCOPE OF DELIVERY

Check all parts for completeness before starting assembly.

ASSEMBLY

Assemble the enclosure in the order shown. Tighten all screw connections on glass by hand only.

01 FIT THE WALL PROFILE

Align the wall profile vertically with a spirit level – 15 mm from the outer tray edge – and mark the drill holes with a pencil. Drill the holes, insert the wall plugs with the rubber mallet and fasten the profile with the 4×30 screws.

02 PREPARE THE GLASS PANEL

Carry the fixed glass panel to the installation site with two people. Note the orientation: the arrows on the glass point up and outwards – panels without arrows can be installed either way round.

03 PLACE THE RUBBER SEALS

Place the rubber seals on the tray edge underneath the fixed glass panel. They relieve pressure on the glass. Trim excess rubber cleanly with a knife after assembly.

04 SLIDE IN THE GLASS PANEL

Carefully slide the fixed glass panel into the fitted wall profile from above until it sits fully in the aluminium profile. Guide the panel steadily and do not let it jam.

05 FIT THE SECOND WALL PROFILE

Align the second profile with a spirit level and mark the drill holes. Drill the holes to plug size, insert the plugs and fasten the profile with the 4×30 screws.

06 INSERT THE GLASS DOOR

Place the glass door with its aluminium profile into the guide rail and hand-tighten the corner joints with the 4×16 screws. Close the screw heads with the cover caps.

Note: The inside of the glass is nano-coated, the outside is marked. Unmarked glass panels can be installed either way round.

07 ATTACH THE SEALS

Fit the cover onto the aluminium corner profile. Then attach the magnetic seal and the wiper seal to the door and insert the fin seal between glass and aluminium profile. Shorten overlong seals with scissors.

08 SCREW AND SEAL THE GUIDE RAIL

Screw the guide rail to the door profile (4×16 screws, by hand). Then seal the splash guard along the shower tray inside and outside with sanitary silicone.

09 FIT THE HANDLE AND FINISH

Fit the handle to the pre-drilled holes in the glass door (Ø 3 mm, 150 mm spacing) – hand-tighten only. Finally attach the cover to the guide rail and seal the edges with silicone.

FOR LASTING ENJOYMENT

CARE INSTRUCTIONS

- 1 Clean only with a soft cloth and clear water.
 - 2 Do not use aggressive cleaners or chemicals.
 - 3 Do not use abrasive objects. For stubborn stains, lightly diluted vinegar water helps – rinse thoroughly afterwards.
 - 4 Wipe down regularly with a damp cotton cloth.
 - 5 **No WC cleaner!** If it accidentally gets onto the enclosure, rinse off immediately with clear water.
-

Note: These instructions are a general standard manual. Product updates may not be included – please use as a reference in case of deviations. Our customer support at wunderbad.com is happy to help with any questions.

CABINA DOCCIA SERIE ED416

DE

EN

IT

FR

PL

Porta doccia a perno con elemento fisso · Montaggio
ad angolo

Serie ED416 – porta a perno con vetro fisso, profili in alluminio nella finitura scelta.

AVVERTENZA – LEGGERE PRIMA DEL MONTAGGIO

- Avvitare le viti sulle superfici in vetro esclusivamente **a mano** – mai con il trapano.
- Posizionare i profili a muro a **15 mm** dal bordo esterno del piatto doccia.
- Gli elementi in vetro sono pesanti: trasportarli sempre **in due** e assicurarli contro il ribaltamento.
- Le frecce sul vetro indicano verso **l'alto e l'esterno**. Gli elementi senza frecce sono utilizzabili su entrambi i lati.

ATTREZZI NECESSARI

Punta $\varnothing$ 3,0 mm e chiave a brugola incluse.

Trapano

Livella

Cacciavite a croce

Martello in gomma

Pistola per silicone + silicone sanitario

Matita

Forbici o taglierino

CONTENUTO DELLA CONFEZIONE

Prima del montaggio verificare la completezza di tutti i componenti.

MONTAGGIO

Montare la cabina nell'ordine indicato. Serrare a mano tutti i collegamenti a vite sul vetro.

01 MONTARE IL PROFILO A MURO

Allineare il profilo a muro in verticale con la livella – a 15 mm dal bordo esterno del piatto – e segnare i fori con la matita. Praticare i fori, inserire i tasselli con il martello in gomma e fissare il profilo con le viti 4×30.

02 PREPARARE L'ELEMENTO IN VETRO

Trasportare in due l'elemento fisso in vetro sul luogo di montaggio. Attenzione all'orientamento: le frecce sul vetro indicano verso l'alto e l'esterno – gli elementi senza frecce possono essere montati su entrambi i lati.

03 POSIZIONARE LE GUARNIZIONI IN GOMMA

Posizionare le guarnizioni in gomma sul bordo del piatto sotto l'elemento fisso in vetro. Servono a scaricare la pressione dal vetro. Dopo il montaggio tagliare la gomma in eccesso con un taglierino.

04 INSERIRE L'ELEMENTO IN VETRO

Inserire con cautela l'elemento fisso dall'alto nel profilo a muro montato, finché non è completamente alloggiato nel profilo in alluminio. Guidare l'elemento in modo continuo senza inclinarlo.

05 MONTARE IL SECONDO PROFILO A MURO

Allineare il secondo profilo con la livella e segnare i fori. Praticare fori della misura dei tasselli, inserire i tasselli e avvitare il profilo con le viti 4x30.

06 INSERIRE LA PORTA IN VETRO

Inserire la porta in vetro con il profilo in alluminio nella guida e avvitare a mano i giunti angolari con le viti 4x16. Chiudere le teste delle viti con i cappucci.

Nota: il lato interno del vetro è trattato con nano-rivestimento, il lato esterno è contrassegnato. Gli elementi non contrassegnati sono montabili su entrambi i lati.

07 APPLICARE LE GUARNIZIONI

Montare la copertura sul profilo angolare in alluminio. Applicare quindi la guarnizione magnetica e la guarnizione raschiatrice alla porta e inserire la guarnizione a lamelle tra vetro e profilo in alluminio. Accorciare con le forbici le guarnizioni troppo lunghe.

08 AVVITARE E SIGILLARE LA GUIDA

Avvitare la guida al profilo della porta (viti 4×16, a mano).
Sigillare quindi il paraspruzzi lungo il piatto doccia,
all'interno e all'esterno, con silicone sanitario.

09 MONTARE LA MANIGLIA E CONCLUDERE

Montare la maniglia sui fori preforati della porta in vetro (Ø 3 mm, interasse 150 mm) – serrare solo a mano. Applicare infine la copertura sulla guida e sigillare i bordi con silicone.

ISTRUZIONI PER LA CURA

- 1** Per la pulizia utilizzare solo un panno morbido e acqua pulita.
- 2** Non utilizzare detergenti aggressivi o prodotti chimici.
- 3** Non utilizzare oggetti abrasivi. Per macchie ostinate è utile acqua leggermente acetata – risciacquare poi abbondantemente.
- 4** Passare regolarmente un panno di cotone umido.
- 5** **Niente detergenti per WC!** In caso di contatto accidentale con la cabina, risciacquare subito con acqua pulita.

Nota: le presenti istruzioni sono un manuale standard generale. Eventuali aggiornamenti del prodotto potrebbero non essere inclusi – in caso di differenze utilizzarle come riferimento. Per qualsiasi domanda il nostro servizio clienti su wunderbad.com è a vostra disposizione.

CABINE DE DOUCHE SÉRIE ED416

DE

EN

IT

FR

PL

Porte de douche pivotante avec élément fixe · Montage
en angle

Série ED416 – porte pivotante avec paroi en verre fixe, profilés en aluminium dans la finition de votre choix.

AVERTISSEMENT – À LIRE AVANT LE MONTAGE

- Visser les vis sur les surfaces vitrées exclusivement **à la main** – jamais avec la perceuse.
- Positionner les profilés muraux à **15 mm** du bord extérieur du receveur de douche.
- Les éléments en verre sont lourds : toujours les porter **à deux** et les protéger contre le basculement.
- Les flèches sur le verre pointent vers **le haut et l'extérieur**. Les éléments sans flèches sont utilisables des deux côtés.

OUTILS NÉCESSAIRES

Foret $\varnothing$ 3,0 mm et clé Allen fournis.

Perceuse

Niveau à bulle

Tournevis cruciforme

Maillet en caoutchouc

Pistolet à silicone + silicone sanitaire

Crayon

Ciseaux ou cutter

CONTENU DE LA LIVRAISON

Vérifiez l'intégralité des pièces avant de commencer le montage.

MONTAGE

Montez la cabine dans l'ordre indiqué. Serrez à la main tous les assemblages vissés sur le verre.

01 MONTER LE PROFILÉ MURAL

Alignez le profilé mural verticalement au niveau à bulle – à 15 mm du bord extérieur du receveur – et marquez les trous au crayon. Percez les trous, insérez les chevilles au maillet en caoutchouc et vissez le profilé avec les vis 4×30.

02 PRÉPARER L'ÉLÉMENT EN VERRE

Portez l'élément fixe en verre à deux jusqu'au lieu de montage. Respectez l'orientation : les flèches sur le verre pointent vers le haut et l'extérieur – les éléments sans flèches peuvent être montés des deux côtés.

03 POSER LES JOINTS EN CAOUTCHOUC EN CAOUTCHOUC

Posez les joints en caoutchouc sur le bord du receveur, sous l'élément fixe en verre. Ils soulagent le verre de la pression. Coupez proprement le caoutchouc excédentaire au cutter après le montage.

04 INSÉRER L'ÉLÉMENT EN VERRE

Glissez précautionneusement l'élément fixe par le haut dans le profilé mural monté, jusqu'à ce qu'il soit entièrement logé dans le profilé en aluminium. Guidez l'élément en continu, sans le coincer.

05 MONTER LE SECOND PROFILÉ MURAL

Alignez le second profilé au niveau à bulle et marquez les trous. Percez aux dimensions des chevilles, insérez les chevilles et vissez le profilé avec les vis 4x30.

06 POSER LA PORTE EN VERRE

Placez la porte en verre avec son profilé en aluminium dans le rail de guidage et vissez les assemblages d'angle à la main avec les vis 4×16. Fermez les têtes de vis avec les caches.

Remarque : la face intérieure du verre porte un nano-revêtement, la face extérieure est marquée. Les éléments non marqués sont montables des deux côtés.

07 POSER LES JOINTS

Montez le cache sur le profilé d'angle en aluminium. Fixez ensuite le joint magnétique et le joint racleur sur la porte, puis insérez le joint à lamelles entre le verre et le profilé en aluminium. Raccourcissez les joints trop longs aux ciseaux.

08 VISSER ET ÉTANCHÉIFIER LE RAIL

Vissez le rail de guidage au profilé de porte (vis 4×16, à la main). Étanchéifiez ensuite la protection anti-éclaboussures le long du receveur, à l'intérieur et à l'extérieur, avec du silicone sanitaire.

09 MONTER LA POIGNÉE ET TERMINER

Montez la poignée sur les trous pré-perçés de la porte en verre (Ø 3 mm, entraxe 150 mm) – serrage à la main uniquement. Posez enfin le cache sur le rail de guidage et étanchéifiez les bords au silicone.

CONSEILS D'ENTRETIEN

- 1 Pour le nettoyage, utilisez uniquement un chiffon doux et de l'eau claire.
- 2 N'utilisez pas de nettoyeurs agressifs ni de produits chimiques.
- 3 N'utilisez pas d'objets abrasifs. Pour les taches tenaces, de l'eau légèrement vinaigrée aide – rincez ensuite abondamment.
- 4 Essuyez régulièrement avec un chiffon en coton humide.
- 5 **Pas de nettoyeur WC !** En cas de contact accidentel avec la cabine, rincez immédiatement à l'eau claire.

Remarque : cette notice est un manuel standard général. Les mises à jour du produit peuvent ne pas y figurer – en cas de différences, utilisez-la comme référence. Notre support client sur wunderbad.com se tient volontiers à votre disposition.

KABINA PRYSZNICOWA SERIA ED416

DE

EN

IT

FR

PL

Drzwi prysznicowe uchylne z elementem stałym ·
Montaż narożny

Seria ED416 – drzwi uchylne ze stałą szybą, profile aluminiowe w wybranym wykończeniu.

OSTRZEŻENIE – PRZECZYTAĆ PRZED MONTAŻEM

- Śruby na powierzchniach szklanych dokręcać wyłącznie **ręcznie** – nigdy wiertarką.
- Profile ściennie umieścić w odległości **15 mm** od zewnętrznej krawędzi brodzika.
- Elementy szklane są ciężkie: zawsze przenosić **we dwie osoby** i zabezpieczyć przed przewróceniem.
- Strzałki na szybie wskazują **do góry i na zewnątrz**. Elementy bez strzałek można montować obustronnie.

POTRZEBNE NARZĘDZIA

Wiertło $\varnothing$ 3,0 mm i klucz imbusowy w zestawie.

Wiertarka

Poziomica

Wkrętak krzyżakowy

Młotek gumowy

Pistolet do silikonu + silikon sanitarny

Ołówek

Nożyczki lub nóż

ZAKRES DOSTAWY

Przed montażem sprawdzić kompletność wszystkich części.

MONTAŻ

Kabinę montować w podanej kolejności. Wszystkie połączenia śrubowe na szkłe dokręcać wyłącznie ręcznie.

01 MONTAŻ PROFILU ŚCIENNEGO

Wyrównać profil ścienny pionowo za pomocą poziomicy – 15 mm od zewnętrznej krawędzi brodzika – i zaznaczyć ołówkiem otwory. Wywiercić otwory, osadzić kołki młotkiem gumowym i przykręcić profil śrubami 4×30.

02 PRZYGOTOWANIE SZYBY

Stały element szklany przenieść we dwie osoby na miejsce montażu. Zwrócić uwagę na orientację: strzałki na szybie wskazują do góry i na zewnątrz – elementy bez strzałek można montować obustronnie.

03 PODŁOŻENIE USZCZELEK GUMOWYCH

Ułożyć uszczelki gumowe na krawędzi brodzika pod stałym elementem szklanym. Odcinają one szkło. Nadmiar gumy po montażu równo odciąć nożem.

04 WSUNIĘCIE SZYBY

Ostrożnie wsunąć stały element szklany od góry w zamontowany profil ścienny, aż w pełni osiadzie w profilu aluminiowym. Element prowadzić równomiernie, nie przekrzywiać.

05 MONTAŻ DRUGIEGO PROFILU ŚCIENNEGO

Wyrównać drugi profil poziomą i zaznaczyć otwory. Wywiercić otwory na wymiar kołków, osadzić kołki i przykręcić profil śrubami 4x30.

06 OSADZENIE DRZWI SZKLANYCH

Osadzić drzwi szklane z profilem aluminiowym w szynie prowadzącej i ręcznie skręcić połączenia narożne śrubami 4×16. Łby śrub zakryć zaślepkami.

Wskazówka: wewnętrzna strona szyby ma powłokę nano, zewnętrzna jest oznaczona. Elementy bez oznaczenia można montować obustronnie.

07 MONTAŻ USZCZELEK

Zamontować osłonę na aluminiowym profilu narożnym. Następnie zamocować na drzwiach uszczelkę magnetyczną i uszczelkę zgarniającą oraz osadzić uszczelkę lamelową między szybą a profilem aluminiowym. Zbyt długie uszczelki skrócić nożyczkami.

08 SKRĘCENIE I USZCZELNIENIE SZYNY

Skręcić szynę prowadzącą z profilem drzwi (śruby 4×16, ręcznie). Następnie uszczelnić osłonę przeciwbryzgową wzdłuż brodzika, wewnątrz i na zewnątrz, silikonem sanitarnym.

09 MONTAŻ UCHWYTU I ZAKOŃCZENIE

Zamontować uchwyt w nawierconych otworach drzwi szklanych (Ø 3 mm, rozstaw 150 mm) – dokręcać wyłącznie ręcznie. Na koniec założyć osłonę na szynę prowadzącą i uszczelnić krawędzie silikonem.

ABY CIESZYĆ SIĘ DŁUGO

WSKAZÓWKI PIEŁĘGNACYJNE

- 1** Do czyszczenia używać wyłącznie miękkiej ściereczki i czystej wody.
- 2** Nie stosować agresywnych środków czyszczących ani chemikaliów.
- 3** Nie używać rysujących przedmiotów. Na uporczywe plamy pomaga woda z niewielkim dodatkiem octu – następnie dokładnie spłukać.
- 4** Regularnie przecierać wilgotną ściereczką bawełnianą.
- 5** **Nie używać środków do WC!** W razie przypadkowego kontaktu z kabiną natychmiast spłukać czystą wodą.

Wskazówka: niniejsza instrukcja jest ogólnym podręcznikiem standardowym. Aktualizacje produktu mogą nie być uwzględnione – w razie różnic traktować jako materiał poglądowy. W razie pytań nasz dział obsługi klienta na wunderbad.com chętnie pomoże.
