

# NISCHENDUSCHE SERIE ENT806

Schiebetür mit Festelement · Montage in der Nische, Wand  
zu Wand

DE

EN

IT

FR

PL

Serie ENT806 – Nischendusche mit Schiebetür und Festelement, Türanschlag links oder rechts montierbar.  
Aluminiumprofile in Ihrer gewählten Ausführung.

## WARNUNG – VOR DER MONTAGE LESEN

- Für die Montage sind **zwei Personen** erforderlich – Glaselemente immer zu zweit tragen und gegen Umkippen sichern.
- Schrauben an Glasflächen ausschließlich **von Hand** eindrehen – niemals mit der Bohrmaschine.
- Beide Wände müssen **lotrecht**, Duschanne bzw. Boden **waagrecht** sein – Maße vor Beginn prüfen.
- Nach dem Versiegeln **24 Stunden** trocknen lassen – die Dusche erst danach benutzen.

ENT806

# LIEFERUMFANG

Prüfen Sie alle Teile vor Beginn der Montage auf Vollständigkeit.

Explosionszeichnung – Position aller Bauteile.

Einzelteile mit Stückzahlen.

# MONTAGE

Montieren Sie die Duschkabine in der angegebenen Reihenfolge. Alle Schraubverbindungen an Glas nur von Hand anziehen.

## BENÖTIGTE WERKZEUGE

Innensechskant- und Gabelschlüssel liegen bei.

Bohrmaschine

Bohrer Ø 6 mm

Kreuzschraubendreher

Wasserwaage

Maßband

Bleistift

Silikonpistole + Sanitärsilikon

## 01 MASSE PRÜFEN UND ANZEICHNEN

Prüfen Sie zuerst die Nische: Beide Wände müssen lotrecht, die Duschwanne waagerecht sein. Messen Sie die Nischenbreite oben und unten und gleichen Sie die Maße mit der Maßtabelle in der Skizze ab.

## 02 TÜRSEITE FESTLEGEN (LINKS/RECHTS)

Die Kabine kann mit Türöffnung links oder rechts montiert werden. Legen Sie die Ausrichtung fest und sortieren Sie die Beschläge entsprechend der Skizze (L/R). Halten Sie die abgebildeten Werkzeuge bereit.

## 03 WANDPROFILE MONTIEREN

Richten Sie die beiden Wandprofile mit der Wasserwaage senkrecht aus und zeichnen Sie die Bohrlöcher an. Bohren Sie mit  $\varnothing 6$  mm, setzen Sie die Dübel ein und verschrauben Sie die Profile gemäß den Detailskizzen.

## 04 HALTER UND VERBINDER MONTIEREN

Montieren Sie die Halter und Eckverbinder gemäß den Detailskizzen an den Wandprofilen – oben und unten. Kontrollieren Sie den festen Sitz aller Schraubverbindungen.

## 05 FESTELEMMENT VORBEREITEN

Stellen Sie das Festelement an die vorgesehene Position und übertragen Sie die Bohrpunkte auf Wand und Boden (X = 6 mm bzw. 8 mm gemäß Skizze). Glaselemente immer zu zweit tragen.

## 06 FESTELEMENT EINSETZEN UND VERSCHRAUBEN

Setzen Sie das Festelement in das Wandprofil ein und verschrauben Sie es gemäß den Detailskizzen mit Haltern und Profilen. Schrauben am Glas nur von Hand anziehen.

## 07 LAUSCHIENE MONTIEREN

Montieren Sie die obere Lauschiene auf dem Festelement und am Wandprofil. Kontrollieren Sie die waagerechte Ausrichtung mit der Wasserwaage, bevor Sie alle Schrauben festziehen.

## 08 LAUFSCHIENE FIXIEREN

Verschrauben Sie die Halter und die Stabilisierung der Laufschiene gemäß den Detailskizzen und setzen Sie die Abdeckkappen auf. Kontrollieren Sie nochmals den festen Sitz.

## 09 ANSCHLAG- UND ABSCHLUSSPROFILE MONTIEREN

Montieren Sie die Anschlag- und Abschlussprofile sowie die Dichtungsträger gemäß den Detailskizzen an Festelement und Wandprofil.

## 10 TÜR MIT ROLLEN EINHÄNGEN

Montieren Sie die Laufrollen an der Glastür und hängen Sie die Tür mit den oberen Rollen in die Laufschiene ein. Achten Sie auf den korrekten Sitz der Rollen (siehe Skizze).

## 11 TÜR JUSTIEREN UND SICHERN

Rasten Sie die unteren Führungsrollen ein und justieren Sie die Rollen mit dem beiliegenden Schlüssel, bis die Tür parallel läuft und sauber schließt. Montieren Sie anschließend die Aushebesicherung.

## 12 DICHTUNGEN ANBRINGEN UND VERSIEGELN

Stecken Sie die Dichtleisten auf Tür und Festelement und versiegeln Sie die Kabine außen entlang der Wandprofile und der Duschwanne mit Sanitärsilikon. Lassen Sie die Fugen **24 Stunden** trocknen, bevor Sie die Dusche benutzen.

DAMIT SIE LANGE FREUDE HABEN

## PFLEGEHINWEISE

- 1 Verwenden Sie zur Reinigung nur ein weiches Tuch und klares Wasser.
- 2 Keine aggressiven Reinigungsmittel oder Chemikalien verwenden.
- 3 Keine kratzenden Gegenstände benutzen. Bei hartnäckigen Flecken hilft essighaltiges Wasser in geringer Konzentration – danach gründlich abspülen.
- 4 Wischen Sie regelmäßig mit einem feuchten Baumwolltuch nach.
- 5 **Kein WC-Reiniger!** Gelangt dieser versehentlich auf die Duschkabine, sofort mit klarem Wasser abspülen.

**Hinweis:** Diese Anleitung ist ein allgemeines Standard-Handbuch. Produktaktualisierungen sind eventuell nicht enthalten – bitte bei Abweichungen als Referenz verwenden. Bei technischen Fragen erstellen Sie einfach ein Ticket bei unserem Kunden-Support: [support@wunderbad.com](mailto:support@wunderbad.com) – wir helfen gerne weiter.

# NICHE SHOWER ENT806 SERIES

Sliding door with fixed panel · Recess installation, wall to wall

DE **EN** IT FR PL

ENT806 series – niche shower with sliding door and fixed panel, door can be fitted left or right. Aluminium profiles in your chosen finish.

## WARNING – READ BEFORE ASSEMBLY

- Assembly requires **two people** – always carry glass panels with two people and secure them against tipping.
- Tighten screws on glass surfaces **by hand only** – never with a drill.
- Both walls must be plumb and the tray or floor level – check all dimensions before starting.
- After sealing, allow **24 hours** to dry – do not use the shower before then.

DO NOT

# SCOPE OF DELIVERY

Check that all parts are complete before starting assembly.

Exploded view – position of all components.

Individual parts with quantities.

# ASSEMBLY

Assemble the enclosure in the order shown. Tighten all screw connections on glass by hand only.

## TOOLS REQUIRED

The hex keys and spanner are included.

## 01 CHECK DIMENSIONS AND MARK OUT

First check the recess: both walls must be plumb and the shower tray level. Measure the recess width at the top and bottom and compare the dimensions with the size table in the drawing.

## 02 CHOOSE THE DOOR SIDE (LEFT/RIGHT)

The enclosure can be fitted with the door opening on the left or right. Decide on the orientation and sort the fittings according to the drawing (L/R). Keep the tools shown ready.

## 03 FIT THE WALL PROFILES

Align the two wall profiles vertically using the spirit level and mark the drill holes. Drill  $\varnothing$  6 mm, insert the wall plugs and screw the profiles on as shown in the detail drawings.

## 04 FIT THE BRACKETS AND CONNECTORS

Fit the brackets and corner connectors to the wall profiles as shown in the detail drawings – at the top and bottom. Check that all screw connections are tight.

## 05 PREPARE THE FIXED PANEL

Place the fixed panel in its intended position and transfer the drill points to the wall and floor (X = 6 mm or 8 mm as shown). Always carry glass panels with two people.

## 06 INSERT AND FIX THE FIXED PANEL

Insert the fixed panel into the wall profile and screw it to the brackets and profiles as shown in the detail drawings. Tighten screws on glass by hand only.

## 07 FIT THE RUNNING RAIL

Fit the top running rail to the fixed panel and the wall profile. Check the horizontal alignment with the spirit level before tightening all screws.

## 08 SECURE THE RUNNING RAIL

Screw on the rail brackets and stabiliser as shown in the detail drawings and fit the cover caps. Check once more that everything is tight.

## 09 FIT THE STOP AND END PROFILES

Fit the stop and end profiles and the seal carriers to the fixed panel and wall profile as shown in the detail drawings.

## 10 HANG THE DOOR WITH ROLLERS

Fit the rollers to the glass door and hang the door in the running rail with the top rollers. Make sure the rollers seat correctly (see drawing).

## 11 ADJUST AND SECURE THE DOOR

Engage the bottom guide rollers and adjust the rollers with the supplied key until the door runs parallel and closes cleanly. Then fit the anti-lift device.

## 12 FIT THE SEALS AND SEAL WITH SILICONE

Push the sealing strips onto the door and fixed panel and seal the outside of the enclosure along the wall profiles and the shower tray with sanitary silicone. Let the joints dry for **24 hours** before using the shower.

FOR LASTING ENJOYMENT

## CARE INSTRUCTIONS

- 1 Use only a soft cloth and clean water for cleaning.
- 2 Do not use aggressive cleaning agents or chemicals.
- 3 Do not use scratching objects. For stubborn stains, lightly diluted vinegar water helps – rinse thoroughly afterwards.
- 4 Wipe down regularly with a damp cotton cloth.
- 5 **No toilet cleaner!** If it accidentally gets onto the enclosure, rinse off immediately with clean water.

**Note:** These instructions are a general standard manual. Product updates may not be included – please use as a reference in case of deviations. If you have any technical questions, simply open a ticket with our customer support: [support@wunderbad.com](mailto:support@wunderbad.com) – we are happy to help.

# DOCCIA A NICCHIA SERIE ENT806

DE

EN

IT

FR

PL

Porta scorrevole con elemento fisso · Montaggio in nicchia, da  
parete a parete

Serie ENT806 – doccia a nicchia con porta scorrevole ed elemento fisso, montabile a destra o a sinistra. Profili in alluminio nella finitura scelta.

## AVVERTENZA – LEGGERE PRIMA DEL MONTAGGIO

- Per il montaggio sono necessarie **due persone** – trasportare i vetri sempre in due e assicurarli contro il ribaltamento.
- Avvitare le viti sulle superfici in vetro esclusivamente **a mano** – mai con il trapano.
- Entrambe le pareti devono essere a piombo e il piatto doccia in piano – verificare le misure prima di iniziare.
- Dopo la sigillatura lasciare asciugare **24 ore** – non usare la doccia prima.

ENT806

# CONTENUTO DELLA FORNITURA

Prima di iniziare il montaggio verificate che tutti i pezzi siano presenti.

Vista esplosa – posizione di tutti i componenti.

Componenti con quantità.

# MONTAGGIO

Montate la cabina nell'ordine indicato. Serrate tutti i collegamenti a vite sul vetro solo a mano.

## ATTREZZI NECESSARI

Le chiavi a brugola e la chiave fissa sono incluse.

## 01 VERIFICARE LE MISURE E TRACCIARE

Verificate prima la nicchia: le pareti devono essere a piombo e il piatto doccia in piano. Misurate la larghezza della nicchia in alto e in basso e confrontate le misure con la tabella nel disegno.

## 02 DEFINIRE IL LATO DELLA PORTA (SINISTRA/DESTRA)

La cabina può essere montata con apertura della porta a sinistra o a destra. Definite l'orientamento e ordinate la ferramenta secondo il disegno (L/R). Tenete pronti gli attrezzi illustrati.

## 03 MONTARE I PROFILI A PARETE

Allineate i due profili a parete in verticale con la livella e segnate i fori. Forate con  $\varnothing 6$  mm, inserite i tasselli e avvitate i profili come nei dettagli.

## 04 MONTARE SUPPORTI E RACCORDI

Montate i supporti e i raccordi angolari sui profili a parete come nei dettagli – in alto e in basso. Controllate il serraggio di tutte le viti.

## 05 PREPARARE L'ELEMENTO FISSO

Posizionate l'elemento fisso nella posizione prevista e riportate i punti di foratura su parete e pavimento (X = 6 mm o 8 mm come nel disegno). Trasportate i vetri sempre in due.

## 06 INSERIRE E FISSARE L'ELEMENTO FISSO

Inserite l'elemento fisso nel profilo a parete e avvitatelo a supporti e profili come nei dettagli. Serrate le viti sul vetro solo a mano.

## 07 MONTARE IL BINARIO DI SCORRIMENTO

Montate il binario superiore sull'elemento fisso e sul profilo a parete. Controllate l'allineamento orizzontale con la livella prima di serrare tutte le viti.

## 08 FISSARE IL BINARIO

Avvitare i supporti e lo stabilizzatore del binario come nei dettagli e applicare i cappucci. Controllare nuovamente il serraggio.

## 09 MONTARE I PROFILI DI BATTUTA

Montare i profili di battuta e di chiusura e i supporti delle guarnizioni su elemento fisso e profilo a parete come nei dettagli.

## 10 AGGANCIARE LA PORTA CON I RULLI

Montate i rulli sulla porta in vetro e agganciate la porta al binario con i rulli superiori. Verificate il corretto posizionamento dei rulli (vedi disegno).

## 11 REGOLARE E BLOCCARE LA PORTA

Agganciate i rulli di guida inferiori e regolate i rulli con la chiave in dotazione finché la porta scorre parallela e chiude bene. Montate infine la sicurezza antisollevamento.

## 12 APPLICARE LE GUARNIZIONI E SIGILLARE

Applicate le guarnizioni su porta ed elemento fisso e sigillate la cabina all'esterno lungo i profili a parete e il piatto doccia con silicone sanitario. Lasciate asciugare i giunti per **24 ore** prima di usare la doccia.

PER UNA LUNGA DURATA

## CONSIGLI PER LA CURA

- 1** Per la pulizia utilizzate solo un panno morbido e acqua pulita.
- 2** Non utilizzate detergenti aggressivi o prodotti chimici.
- 3** Non utilizzate oggetti abrasivi. Per le macchie ostinate aiuta acqua con poco aceto – risciacquare poi abbondantemente.
- 4** Passate regolarmente un panno di cotone umido.
- 5** **Niente detergenti per WC!** In caso di contatto accidentale con la cabina, risciacquare subito con acqua pulita.

**Nota:** le presenti istruzioni sono un manuale standard generale. Eventuali aggiornamenti del prodotto potrebbero non essere inclusi – in caso di differenze utilizzare come riferimento. Per qualsiasi domanda tecnica aprite semplicemente un ticket presso il nostro servizio clienti: [support@wunderbad.com](mailto:support@wunderbad.com) – saremo lieti di aiutarvi.

# DOUCHE EN NICHE SÉRIE ENT806

Porte coulissante avec élément fixe · Montage en niche, de mur à mur

Série ENT806 – douche en niche avec porte coulissante et élément fixe, montage à gauche ou à droite. Profilés en aluminium dans la finition choisie.

## AVERTISSEMENT – À LIRE AVANT LE MONTAGE

- Le montage nécessite **deux personnes** – portez les éléments en verre toujours à deux et sécurisez-les contre le basculement.
- Serrez les vis sur les surfaces vitrées exclusivement **à la main** – jamais avec une perceuse.
- Les deux murs doivent être d'aplomb et le receveur de niveau – vérifiez les dimensions avant de commencer.
- Après le scellement, laissez sécher **24 heures** – n'utilisez pas la douche avant.

ENT806

# CONTENU DE LA LIVRAISON

Vérifiez que toutes les pièces sont complètes avant de commencer le montage.

Vue éclatée – position de tous les composants.

|                                                                                        |                                                                                                |                                                                                             |                                                                                        |                                                                                                 |                                                                                                  |                                                                                          |                                                                                          |

Pièces détachées avec quantités.

# MONTAGE

Montez la cabine de douche dans l'ordre indiqué. Serrez toutes les vis sur le verre uniquement à la main.

## OUTILS NÉCESSAIRES

Les clés Allen et la clé plate sont fournies.

## 01 VÉRIFIER LES DIMENSIONS ET TRACER

Vérifiez d'abord la niche : les deux murs doivent être d'aplomb et le receveur de niveau. Mesurez la largeur de la niche en haut et en bas et comparez les dimensions avec le tableau du schéma.

## 02 DÉFINIR LE CÔTÉ DE LA PORTE (GAUCHE/DROITE)

La cabine peut être montée avec l'ouverture de porte à gauche ou à droite. Définissez l'orientation et triez les ferrures selon le schéma (L/R). Préparez les outils illustrés.

### 03 MONTER LES PROFILÉS MURAUX

Alignez les deux profilés muraux verticalement à l'aide du niveau à bulle et marquez les trous. Percez à  $\varnothing$  6 mm, insérez les chevilles et vissez les profilés selon les détails.

## 04 MONTER LES SUPPORTS ET RACCORDS

Montez les supports et raccords d'angle sur les profilés muraux selon les détails – en haut et en bas.  
Contrôlez le serrage de toutes les vis.

## 05 PRÉPARER L'ÉLÉMENT FIXE

Placez l'élément fixe à la position prévue et reportez les points de perçage sur le mur et le sol (X = 6 mm ou 8 mm selon le schéma). Portez les éléments en verre toujours à deux.

## 06 INSÉRER ET FIXER L'ÉLÉMENT FIXE

Insérez l'élément fixe dans le profilé mural et vissez-le aux supports et profilés selon les détails. Serrez les vis sur le verre uniquement à la main.

## 07 MONTER LE RAIL DE COULISSEMENT

Montez le rail supérieur sur l'élément fixe et le profilé mural. Contrôlez l'alignement horizontal au niveau à bulle avant de serrer toutes les vis.

## 08 FIXER LE RAIL

Vissez les supports et le stabilisateur du rail selon les détails et posez les caches. Vérifiez encore une fois le serrage.

## 09 MONTER LES PROFILÉS DE BUTÉE

Montez les profilés de butée et de finition ainsi que les supports de joints sur l'élément fixe et le profilé mural selon les détails.

## 10 SUSPENDRE LA PORTE AVEC LES ROULETTES

Montez les roulettes sur la porte en verre et suspendez la porte au rail par les roulettes supérieures. Veillez au bon positionnement des roulettes (voir schéma).

## 11 RÉGLER ET SÉCURISER LA PORTE

Enclenchez les roulettes de guidage inférieures et réglez les roulettes avec la clé fournie jusqu'à ce que la porte coulisse parallèlement et ferme proprement. Montez ensuite la sécurité anti-soulèvement.

## 12 POSER LES JOINTS ET SCELLER

Emboîtez les joints sur la porte et l'élément fixe et scellez la cabine à l'extérieur le long des profilés muraux et du receveur avec du silicone sanitaire. Laissez sécher les joints **24 heures** avant d'utiliser la douche.

POUR EN PROFITER LONGTEMPS

## CONSEILS D'ENTRETIEN

- 1 N'utilisez qu'un chiffon doux et de l'eau claire pour le nettoyage.
- 2 N'utilisez pas de détergents agressifs ni de produits chimiques.
- 3 N'utilisez pas d'objets abrasifs. Pour les taches tenaces, de l'eau légèrement vinaigrée aide – rincez ensuite abondamment.
- 4 Essuyez régulièrement avec un chiffon en coton humide.
- 5 **Pas de nettoyant WC !** En cas de contact accidentel avec la cabine, rincez immédiatement à l'eau claire.

**Remarque :** cette notice est un manuel standard général. Les mises à jour du produit peuvent ne pas être incluses – en cas de différences, utilisez-la comme référence. Pour toute question technique, ouvrez simplement un ticket auprès de notre support client : [support@wunderbad.com](mailto:support@wunderbad.com) – nous vous aiderons volontiers.

# KABINA WNĘKOWA SERIA ENT806

Drzwi przesuwne z elementem stałym · Montaż we wnęce, od  
ściany do ściany

Seria ENT806 – kabina wnetkowa z drzwiami przesuwymi i elementem stałym, montaż lewo- lub prawostronny. Profile aluminiowe w wybranym wykończeniu.

## OSTRZEŻENIE – PRZECZYTAĆ PRZED MONTAŻEM

- Do montażu potrzebne są **dwie osoby** – elementy szklane zawsze przenosić we dwie osoby i zabezpieczyć przed przewróceniem.
- Śruby przy powierzchniach szklanych dokręcać wyłącznie **ręcznie** – nigdy wiertarką.
- Obie ściany muszą być pionowe, a brodzik poziomy – przed rozpoczęciem sprawdzić wymiary.
- Po uszczelnieniu pozostawić do wyschnięcia na **24 godziny** – wcześniej nie korzystać z prysznica.

ENT806

# ZAKRES DOSTAWY

Przed rozpoczęciem montażu sprawdzić kompletność wszystkich części.

Rysunek złożeniowy – położenie wszystkich elementów.

Poszczególne części z ilościami.

# MONTAŻ

Kabinę montować w podanej kolejności. Wszystkie połączenia śrubowe przy szkłe dokręcać wyłącznie ręcznie.

## POTRZEBNE NARZĘDZIA

Klucze imbusowe i klucz płaski znajdują się w zestawie.

## 01 SPRAWDZIĆ WYMIARY I WYTRASOWAĆ

Najpierw sprawdzić wnękę: obie ściany muszą być pionowe, a brodzik poziomy. Zmierzyć szerokość wnęki u góry i u dołu i porównać wymiary z tabelą na rysunku.

## 02 OKREŚLIĆ STRONĘ DRZWI (LEWA/PRAWA)

Kabinę można zamontować z otwieraniem drzwi z lewej lub prawej strony. Ustalić orientację i posortować okucia zgodnie z rysunkiem (L/R). Przygotować pokazane narzędzia.

## 03 ZAMONTOWAĆ PROFILE ŚCIENNE

Wyrównać oba profile ścienne pionowo za pomocą poziomicy i zaznaczyć otwory. Wywiercić otwory  $\varnothing 6$  mm, włożyć kołki i przykręcić profile zgodnie z rysunkami szczegółowymi.

## 04 ZAMONTOWAĆ UCHWYTY I ŁĄCZNIKI

Zamontować uchwyty i łączniki narożne na profilach ściennych zgodnie z rysunkami – u góry i u dołu. Sprawdzić dokręcenie wszystkich połączeń śrubowych.

## 05 PRZYGOTOWAĆ ELEMENT STAŁY

Ustawić element stały w przewidzianej pozycji i przenieść punkty wiercenia na ścianę i podłogę (X = 6 mm lub 8 mm wg rysunku). Elementy szklane zawsze przenosić we dwie osoby.

## 06 WSTAWIĆ I PRZYKRĘCIĆ ELEMENT STAŁY

Wsunąć element stały w profil ścienny i przykręcić go do uchwyty i profili zgodnie z rysunkami. Śruby przy szkle dokręcać wyłącznie ręcznie.

## 07 ZAMONTOWAĆ SZYNĘ JEZDĄ

Zamontować górną szynę jezdnią na elemencie stałym i profilu ściennym. Przed dokręceniem wszystkich śrub sprawdzić poziomą wypoziomowanie.

## 08 ZAMOCOWAĆ SZYNĘ

Przykręcić uchwyty i stabilizator szyny zgodnie z rysunkami i założyć zaślepki. Ponownie sprawdzić dokręcenie.

## 09 ZAMONTOWAĆ PROFILE ODBOJOWE

Zamontować profile odbojowe i wykończeniowe oraz listwy uszczeliek na elemencie stałym i profilu ściennym zgodnie z rysunkami.

## 10 ZAWIESIĆ DRZWI NA ROLKACH

Zamontować rolki na drzwiach szklanych i zawiesić drzwi na szynie za pomocą górnych rolek. Zwrócić uwagę na prawidłowe osadzenie rolek (patrz rysunek).

## 11 WYREGULOWAĆ I ZABEZPIECZYĆ DRZWI

Zatrzasnąć dolne rolki prowadzące i wyregulować rolki dołączonym kluczem, aż drzwi będą prowadzone równoległe i domykać się prawidłowo. Na koniec zamontować zabezpieczenie przed wypięciem.

## 12 ZAŁOŻYĆ USZCZELKI I USZCZELNIĆ

Nałożyć uszczelki na drzwi i element stały oraz uszczelnić kabinę od zewnątrz wzdłuż profili ściennych i brodzika silikonem sanitarnym. Pozostawić fugi do wyschnięcia na **24 godziny** przed użyciem prysznica.

ABY CIESZYĆ SIĘ DŁUGO

## WSKAZÓWKI PIELEGNACYJNE

- 1** Do czyszczenia używać wyłącznie miękkiej ściereczki i czystej wody.
- 2** Nie stosować agresywnych środków czyszczących ani chemikaliów.
- 3** Nie używać rysujących przedmiotów. Na uporczywe plamy pomaga woda z niewielkim dodatkiem octu – następnie dokładnie spłukać.
- 4** Regularnie przecierać wilgotną ściereczką bawełnianą.
- 5 Nie używać środków do WC!** W razie przypadkowego kontaktu z kabiną natychmiast spłukać czystą wodą.

**Wskazówka:** niniejsza instrukcja jest ogólnym podręcznikiem standardowym. Aktualizacje produktu mogą nie być uwzględnione – w razie różnic traktować jako materiał poglądowy. W razie pytań technicznych wystarczy utworzyć zgłoszenie w naszym dziale obsługi klienta: [support@wunderbad.com](mailto:support@wunderbad.com) – chętnie pomożemy.
